

Profile

BS Information Technology student interested in networking, IT support, and cybersecurity. Developing hands-on skills in network configuration, troubleshooting, and system administration through academic projects and practical activities.

Education

Dr. Yanga's Colleges, Inc.

2023 - 2027

Bachelor Of Science in Information Technology

Bocaue, Bulacan

Projects & Experience

Cisco Packet Tracer LAN & Subnetting Simulation

December 2025

Network Simulation / Student

- Designed and configured a LAN using Cisco Packet Tracer, applying subnetting and IP addressing.
- Configured routers and switches and performed connectivity testing using ping.
- Calculated subnet masks, network addresses, usable IP ranges, and broadcast addresses for the simulated network.

SafeComm: An AI-Enhanced Platform for Community Gender-Based Violence Reporting, Tracking, and Risk Prediction

2025 - 2026

Documentation & Planning

- Prepared and organized project documentation, including project plans and system requirements.
- Contributed to planning the system's features, scope, workflow, and overall project direction.

Subnetted Network Design and OSPF Routing

2025 - 2026

Network Configuration / Student

- Designed and configured a multi-router network topology using Cisco Packet Tracer, applying subnetting and IPv4 addressing based on different host requirements.
- Configured OSPF Area 0 for dynamic routing between three routers.

CERTIFICATIONS & LICENSES

- Information Technology Specialist – Cybersecurity
- Microsoft Office Specialist - Microsoft Excel
- Cisco Networking Academy - Computer Hardware Basics

TECHNICAL SKILLS

- **Networking:** Cisco Packet Tracer, Networking Fundamentals, IP Addressing, Subnetting, OSPF, Network Troubleshooting
- **IT Support:** Technical Support, Hardware Troubleshooting, Windows, Linux Fundamentals
- **Productivity:** Microsoft Excel, Microsoft Office
